er time than paid for. THE DAILY NEWS will be served to subscribere in

the city at 15 cents a week. ADVERTISEMENTS .- First insertion, 15 cents a line subsequent insertions, 10 cents a line. Business Notices, 20 cents a line. Marriage and Funeral Notices, One Dollar each.

NEWS SUMMARY.

-Gold closed in New York vesterday active -Cotton closed heavy and decidedly lower.

Sales 1200 bales. Middling 304c. -In Liverpool cotton closed irregular. Sales 2000 bales. Uplands 13.1; Orleans 131d.

-The lessee of the postoffice fence in New York will clear \$200,000. -Private theatricals have been the rage at

m my of the watering places, and will be very pepular in New York society the coming winter. -There are said to be 38 000 members of the order of Knights of the White Camelia in Texas. It is said to comprise the best and wealthest citizens of the State.

-Manassas, Va., is rapidly improving. It has now about eighty buildings, two churches, three schools (one colored.) two hotels, one steam mill, one sumae mill, five stores, one newspaper, one tin shop, two shoe shops, two wheelright shops.

-Although Vermont is understood to be the

stronghold of the Republican party, yet the Democracy made great gains at the last State election. The Montpelier Argus has a carefully written summary of the result, showing no less than five towns which have been redeemed, and will this year be represented by Democrats in the Legislature.

-The Baltimore Catholic Mirror publishes the statement that President Grant, when called upon lately by Father Wilson, of St Dominie's Church, in that city, for a contribution, replied that he "had no money to spare, and if he had, none of it would be given towards Catholic objects, as during the recent war the Catholics, as a body, were rebels, and had identified themselves with slavery and rebellion."

The ticket headed by Judge Deut, and nominated by the recent Conservative Republi-can Convention in Mississippi, is said, by the local papers, to combine all the elments of strength. The candidate for State Auditor is Colonel A. W. Willis, a Union officer lately decapitated by Ames. The candidate for Atlorney-General is General Robert Lowry, an ex-Confederate. The candidate for Secretary of State is Thomas St. Clair, a respectable colored man, a builder by trade; and Joseph McCloy, publisher of the National Republican newspi per, is the nomince for State Treasurer. The Dent candidate for Congress in the Second District is Judge William Kollogg, late member of Congress from Illinois.

-The Humboldt medal, struck in the United States to commemorate the hundredth anniversary of the birthday of the illustrious German philosopher, naturalist and traveller, is a work of great merit. The medal, two inches in diameter, is composed of bronze: the obverse presents a profile head of Humboldt, copied from the best models to be "Alexander von Humboldt," in large letters and underneath the name, in smaller letters. "Born September 14th, 1769, died May 6th, 1859;" the reverse contains the legend, "Earth and Heaven he explored, revealed Nature and freed the mind." This medal was executed by Mr. Anthony C. Paquet, of Philadelphia, the skilled die-sinker, whose other medals, and whose seven years' service in the Unit a States

Mint, have proved his ability as an ortist. -A special dispatch to the New York Times from Washington, says: "There is good reason to believe that Scuator Sumner, who is to proside at the Massachusetts Republican State Convention at Worcester, on the 22d instant designs on that occasion to make an important and possibly very significant speech on the present condition of public affairs. He is known to be dissatisfied with the present attitude of the administration on the foreign questions, Cuba and Alabama claims, and will strongly oppose any movement for the recogtion of Cuba, to which he fears the administration is already committed. He is for maintaining the high ground of non-interference, thus enforcing a great moral example upon England's attention, and increasing by its effect the enormity of her wrong-doing in the hasty and complete recognition of the Southern bet

-Fall bonnets are decidedly larger than those of last season. They are high, towering structures, in the Henri Quatre and Louis Quinze styles, and once more begin to resemble a bona fide bonnet. The frame fits the head like a close cap, and worn very far for-ward. A standing revers of velvot or silk is turned up at the front and at the back. The space between these is filled by a high Watteau puff, on which is looped a mass of trim-ming, which seems to be held in place by the upright revers. Narrow ribbons tied under the chin hold the bonnet securely. Another style, of Quakerish simplicity, resembling an infant's bonnet in shape, has a close fitting band in front, and a deep, flat back, or crown, falling in two or three curves below to fit over the conflare of chatelain braids, with reference to which it was evidently designed. The front frames the face plainly, without ornament; the back is adorned with trailing feathers and vines that hang among the low braids.

-An exhibition of noble devotion to duty under the most tearful trial to which human nature could be subjected, is to be recorded of an obscure servant of a railroad near New York City: The deed demands the warmes and widest recognition. It needs no fine words to embellish it. The simplest recital of the facts suffices for placing the action before the world as worthy of its homage. Albert G. -ker is the watchman of the Passaic River on the New York and Newark Rail-

and it is to see that the draw a Dassenger

2 1 1 Wale

well suppose it was a moment of extreme agony. His child was drowning before his eyes, and its life could only be purchased at the less of many other lives that were in his hands. God mercifully spare us all from the bitter anguish of such a trial as was forced upon Drecker! He stood by his duty; the bridge was closed, and the train passed safety over it, bu! the bon was drowned! Little did any passenger in this train dream at what a fearful struggle between a sense of duty and the natural promptings of the human heart the safe passage of the bridge had been se-

-A locomotive boiler explosion of a peculiar

ly terrible character occured last Friday on the Eric Railway, near that fatal spot-the scene of so many disasters-Port Jervis, and resulted in the almost total destruction of the locomotive and the death of four men-Russell Harris the engineer; William Bowers, the fireman; Goorge Rosencrans, the brakem; n; and John Borleigh, the flagman. At the time of the explosion, the train must have been running very slowly, as it ran only about a hundred feet after the accident. The terrible force which lies pent in a locomotive boiler may be interred the fact that in this instance the dome was blown into the air, over two lofty trees. and landed on the river bank nearly an eighth of a mile distant; large fragments of the boiler were hurried over the dwelling houses in the vicinity, and to great distances from the scene of disaster, and the rails under the engine were bent into semi-circles. The report was heard five miles away and resembled the discharge of a cannon, followed by a rumbling which reverberated for two or three The explosion took place near a tanseconds. nery, and nearly every one of the one bundred and fifty employees were soon on the ground. The body of the flagman was first discovered lying on a stone wall about one hundred feet from the train; another was found fifty feet beyond, and a third was thrown over two hundred feet from the wreck. The head of the fligman was flattened out like a plate, and the soles of his boots were swept off, and the fireman and brakeman were disfigured almost beyond recognition. The body of the engineer was not found until nearly nine o'clock in the forenoon. It was fished up from the river, and it was discovered that an iron bolt had entered the left side and passed almost through the body. The face, however, was not disfigured, and expressed nothing but perfect rest at d repose. The cause of the disaster is unknown,

CHARLESTON.

THURSDAY MORNING, SEPT. 16, 1869.

The Immigrants.

The Newberry Immigration Society is still actively pushing forward the important work which it inaugurated last year with so much success. A letter from Mr. T. S. Boinest, the president of the society, announces that it has already brought in about three hundred immigrants, the large majority of whom have proved excellent laborers. In view of the probable scarcity of labor next year, the society anticipates more orders for immigrants than it will be able to fill. Those who wish to obtain laborers through this channel are therefore urged to file their orders as seen as possible. The society's agent will go to Castle Garden early in November and remain there until near the end of December, and secure all the laborers who can be induced to come South; and these will be given to parties who have ordered, the operations of the society being conducted upon the "first come-first served" principle. It is hoped that some of the immigrants will be sent on as early as the middle of November, so as to be of service in securing the cotton crop. Negotiations are now in progress to induce procured in Germany, with the inscription, all the railroads in the State to transport immigrants at reduced rates. God speed

> The Championship of the Car-Cuffee on his Muscle.

Some months ago, when the Oxford-Harvard rowing match was first projected, THE News offered a mild suggestion that an opportunity be given to a picked crew of the lusty black oarsmen of our sea islands to show what they could do in one of their own peculiar race-boats in a contest of power, endurance and skill, with the crack crews who claim to represent in its perfection the rowing science of the two continents. We knew that the trained beatmen of the plantations, whose lives had been spent on the water, had acquired a style of rowing which, previous to the war, had been the wonder and admiration of all strangers who were competent to judge of such matters, and we had hoped that no mawkish prejudice as to "race, color or previous con-"dition" would have denied to "the man "and brother" the chance to assert his claim to the championship of the oar. Our proposition was reproduced in the Northern papers with various comments; but nothing ever came of it, and no invitation was extended to Cuffee to take part in the Great Race. We understand, however, that a Northern gentleman of means, who is extensively engaged in planting on the sea islands, struck with the remarkable speed which he saw attained by some of the negro boatmen in his employ, has now determined to extend in their behalf to the rowing clubs of the world a challenge to another grand contest. We trust that the offer of Cuffee to exhibit his muscle will, this time, meet with a more cordial wel-

THE skies are brightening. The Democratic victory in California is overwhelming, and the Democrats have three fourths of the Legislature. In the last Legislature the Republicans had the Senate by four m jority, and the Democrats the Lower House by twenty-four majority. A Cheyenne dispatch announces that the Democrats have also carried Wyoming Torritory, electing their candidate to Congress. Thus the extreme West thunders in response to the Democratic victories in Kentucky, Tennessee, Virginia and Montana

Tag Winnsboro' News thinks the propocition of the meeting in Union County to udiate the Radical State debt comes too . With regard to Governor Scott's pet eme, it says: "Now the State would

ot perhaps approve of the Blue Ridge Railroad job, if it were a question ab initio. but three or four millions having been in-"vested in the job already, the sentiment "of the State is, that less will be lost by "faishing it than by stopping short with it

A STATE OF THE STA

f "half way."

A White Man's Government.

When the "Little Giant" of Illinois tersey gave utterance to the truth that "this is "the white man's government," he little dreamed of the importance that his words were destined to assume, as an axiom in the future politics of his country. In spite of the mouthings of demagogues and fanatics, in spite of the temporary prevalence of negro rule over some of the fairest sections of our land, that grand, yet simple declare tion of Mr. Douglas steadily gathers for and oredit with the people of North and alike. And it is worth while that ored people, who have been to gard the saying as a denial of rent rights, should hear what unquestionable Ethiopian, very few individuals of exhibited the white and the street of a great truth—has the street of the st of a great truth—hand an educational conversational conversation by held at Louisville, Ken's property and conversation of the paid and conversation of the paid

dices, them no person's leace for my sanity, wher I, a colored men, and a life-long agual "dimer's rights, declare, as I now do that this is a solde man's country. In all its wide-spread consider of mountain, valley and plain, of river, lake and ocean, of densely crowded city and uninhabited wild, from ste rile, frozen Alaska to the warm shores of the Gulf, this country belongs to the white man, to him and his heirs forever. It was a white man's ship burst through the gloom which had shrouded this continent from the eyes o the old world for so many centuries, and it was a white man who teaped first upon the shore claiming the new land for himself and his brethren. White men have conquered this conti nent. Its tooming fields, its mines, its wealth producing industries, its thousand cities, be ong to them. This is a white man's civiliza We gain colightenment from a literature which, in all its varied departmentshilosophy, theology, physics, mathematics. poetry and the drama-white men have been perfecting for 3000 years. This, too, is a white man's government. Our Union of States, our guarantee of free thought and free speech, our nethod of enacting laws by men selected by the people-all these are his peculiar modes, and are the crystallized results of his political experience. In numbers, in intelligent energy, the white man stands at the head of all the races which have found a home in America. White men have come to us by hundreds of thou sands each year, by millions every ten years. They have, do and will control the destinies of

the people residing upon this confinent." Could Stephen A. Douglas himself have uttered a more forcible and elequent vindication of his race ?

Educational.

FRESH DRUGS,

HONEY 1

ST. CLOUD HOTEL.

THIS NEW AND COMMOLIOUS HOUSE, LOGATED corner of Broadway and Forty-second-street,
possesses advantages over all other houses for the secommodation of its creets. It was built expressly
for a first-class family bearding house—the rooms
being large and en smite, heated by steam—with hot
and cold water, and furnished second to none; white
the cullinary department is in the most experienced
hands, affording guests an unequalied table.

Une of Atwood's Patent Elevators is also among
the "modern improvements" and at the service of
quests at all hours.

The Broadway and University Pisco Cars pass the
door every four infinutes, running from the City
Hall to Central Park, while he sixth and events
Avenue lines are but a short blook on citizer side,
affording ample facilities for communicating with all
the depots, steamboat landings, claces of amusement and business of the great metropolis.

MORE & HULLEY, Proprietors.
